

# TMF2H918

123 RM RANGE 121-125

## TRAIT VERSIONS WITH SAME BASE GENETICS

TMF2H919 - SSX/LL/RR2

### KEY STRENGTHS

- Tall, full-season hybrid, especially well-adapted to the California and Southwest silage markets.
- Offers high tonnage, excellent staygreen, drought tolerance and standability.
- Excellent gray leaf spot tolerance will allow it to move into Eastern markets where high tonnage is top priority.
- Very tall plants with high ear placement and flex-ear style.
- Recommend kernel processing.

### CHARACTERISTICS CHART

### MANAGEMENT GUIDELINES

- Highly recommended for silage use within its adapted maturity.
- Excellent plant agronomics will support moderate-high to high plant densities, especially under irrigated production.
- Roundup Ready® and Ignite® herbicide technologies expand weed control options and provide an alternative for managing herbicide resistance.
- A strong fertility program for silage production is important to maximize tonnage and maintain the quality of the silage.
- Monitor harvest moisture closely as harvest approaches. Hybrids may be drier or wetter than physical appearance indicates.
- When storing TMF hybrids in a pile or a bunker, recommended moisture levels for harvesting range from 65 percent to 68 percent moisture; for bags, 62 percent to 68 percent.
